ATTENDANCE TRACKER WEBSITE

Test Cases and Expected Results — Basic Functional Testing

Note: These are suggested test cases based on the attendance-tracker website workflow. Confirm each result by running the test on the actual website; do not treat the expected results as verified outcomes.

Test Case ID	Feature / Module	Test Scenario	Test Steps	Expected Result	Status
TC-01	Website access	Open the website	1. Open a browser. 2. Visit the website URL.	The website loads and the main page is displayed.	Not Run
TC-02	Dashboard	View dashboard summary	1. Open the website. 2. Inspect the dashboard and summary cards.	Dashboard information and available navigation are displayed correctly.	Not Run
TC-03	Student management	Add a student	1. Open student management. 2. Enter valid student details. 3. Save.	The student is saved and appears in the student list, if this feature is supported.	Not Run
TC-04	Student management	Submit incomplete student details	1. Open the add-student form. 2. Leave a required field empty. 3. Submit.	A clear validation message appears and invalid data is not saved.	Not Run
TC-05	Subject management	Add or select a subject	1. Open subject management or the subject selector. 2. Add/select a valid subject.	The subject can be saved or selected as supported by the website.	Not Run
TC-06	Attendance	Mark a student present	1. Choose a subject and date. 2. Mark a student Present. 3. Save/submit.	The attendance record is saved and shows Present.	Not Run
TC-07	Attendance	Mark a student absent	1. Choose a subject and date. 2. Mark a student Absent. 3. Save/submit.	The attendance record is saved and shows Absent.	Not Run
TC-08	Attendance	Change an attendance record	1. Open an existing record. 2. Change Present to Absent or vice versa. 3. Save.	The updated status is reflected in the record and summary.	Not Run
TC-09	Duplicate handling	Try saving attendance twice for the same student, subject and date	1. Save an attendance record. 2. Repeat the action for the same student, subject and date.	The website prevents duplicates or clearly handles the repeated entry.	Not Run
TC-10	Results / reports	View attendance totals and percentage	1. Open the results or report area. 2. Inspect present/absent totals and percentage.	Totals and percentage match the saved attendance records.	Not Run
TC-11	Search / filter	Search for a student or filter records	1. Enter a known student name or use an available filter.	Matching records are shown; no-match searches are handled clearly.	Not Run
TC-12	Data persistence	Refresh after saving a record	1. Save an attendance record. 2. Refresh or reopen the page. 3. Check the record.	Saved data remains available if the website is designed to persist records.	Not Run

Test Case ID	Feature / Module	Test Scenario	Test Steps	Expected Result	Status
TC-13	Date handling	Select a different attendance date	1. Choose another valid date. 2. View or mark attendance.	Records correspond to the selected date and do not unintentionally overwrite other dates.	Not Run
TC-14	Responsive layout	Open on a mobile-sized screen	1. Resize the browser or use a mobile device. 2. Navigate the main features.	Content remains readable and controls are usable without unintended overflow.	Not Run

How to use this document

Run each test case on the website and change the Status column to Pass, Fail, or Blocked. If a feature listed above is not available on the live website, mark it Not Applicable and note the reason. Record the actual result and any defect separately if your instructor requires detailed test evidence.
